BEFORE THE BOARD OF PATENT APPEALS AND INTERFERENCES

Application Number: 09/758,112 Filing Date: January 03, 2001 Appellant(s): BOUBEZ ET AL.

> Brian J. Teague For Appellant

EXAMINER'S ANSWER

This is in response to the appeal brief filed October 13, 2011 appealing from the Office action mailed July 6, 2011.

Application/Control Number: 09/758,112 Page 3

Art Unit: 3691

(1) Real Party in Interest

The examiner has no comment on the statement, or lack of statement, identifying by name the real party in interest in the brief.

(2) Related Appeals and Interferences

The following are the related appeals, interferences, and judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal:

09/758,112

09/753.964

09/655,196

(3) Status of Claims

The following is a list of claims that are rejected and pending in the application:

Claims 1-4, 6-14, 16-24, and 26-30 are rejected under 102(e) as being anticipated by Yun (7,584,120).

(4) Status of Amendments After Final

The examiner has no comment on the appellant's statement of the status of amendments after final rejection contained in the brief.

(5) Summary of Claimed Subject Matter

The examiner has no comment on the summary of claimed subject matter contained in the brief.

(6) Grounds of Rejection to be Reviewed on Appeal

Application/Control Number: 09/758.112 Page 4

Art Unit: 3691

The examiner has no comment on the appellant's statement of the grounds of rejection to be reviewed on appeal. Every ground of rejection set forth in the Office action from which the appeal is taken (as modified by any advisory actions) is being maintained by the examiner except for the grounds of rejection (if any) listed under the subheading "WITHDRAWN REJECTIONS." New grounds of rejection (if any) are provided under the subheading "NEW GROUNDS OF REJECTION."

(7) Claims Appendix

The examiner has no comment on the copy of the appealed claims contained in the Appendix to the appellant's brief.

(8) Evidence Relied Upon

7,584,120 Yun 1-2009

(9) Grounds of Rejection

The following ground(s) of rejection are applicable to the appealed claims:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filled in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filled in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 55(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3691

Claims 1-4, 6-14, 16-24, and 26-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Yun (7,584,120).

Yun discloses a system and corresponding method and apparatus for categorizing data comprising in a data processing system, of registering services in a taxonomy, comprising: receiving a registration request at the data processing system, the registration request including a service description and an identification of a category within the taxonomy in which the service is to be registered, determining if the service description should be registered in the identified category based on a canonical service description associated with the category; and registering the service description in the identified category using the data processing system if the determination is that the service description should be registered in the identified category and if it is determined that the service description should not be registered in the category, determining whether a request to add a new category is received (col.4, line 65 to col.5. line 11; col.6, line 1 to col.9, line 30); wherein the canonical service description identifies minimum criteria for the category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein registering the service description in the category includes storing the service description and an associated model description in a storage in association with the category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the method is implemented in a service broker within at least one network (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein if a request to add a new category is received, a determination is made as to whether to add the new category, and

Art Unit: 3691

wherein if the new category is added, the service description is registered in association with the new category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30): wherein the canonical service description includes information identifying minimum requirements of the category regarding one or more of security requirements, privacy requirements and communication protocol requirements (col.4, line 65 to col.5, line 11: col.6, line 1 to col.9, line 30); wherein if it is determined that the service description should not be registered in the category, the method further comprises; searching the taxonomy for an alternate category in which the service description should be registered and registering the service description in the alternate category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein searching the taxonomy for an alternate category includes searching one or more of sibling, parent and child categories of the identified category within a predetermined range of the identified category in the taxonomy (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein searching the taxonomy for an alternate category includes searching the taxonomy for a category in which the service description meets requirements of a canonical service description associated with the alternate category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); a computer program product in a computer readable medium for registering services in a taxonomy, comprising: first instructions for receiving a registration request, the registration request including a service description and an identification of a category within the taxonomy in which the service is to be registered; second instructions for determining if the service description should be registered in the identified category based on a canonical service description associated with the

Art Unit: 3691

category, third instructions for registering the service description in the identified category if the determination is that the service description should be registered in the identified category, fourth instructions for determining whether a request to add a new category is received if it is determined that the service description should not be registered in the category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the third instructions for registering the service description in the category includes instructions for storing the service description and an associated model description in a storage in association with the category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the computer program product is executed in a service broker within at least one network (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); fifth instructions for determining whether to add the new category, if a request to add a new category is received, and sixth instructions for registering the service description in association with the new category, if the new category is added (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the canonical service description includes information identifying minimum requirements of the category regarding one or more of security requirements, privacy requirements and communication protocol requirements (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); instructions for searching the taxonomy for an alternate category in which the service description should be registered if the result of execution of the second instructions is that the service description should not be registered in the category and fifth instructions for registering the service description in the alternate category if an alternate category is identified by execution of the fourth instructions (col.4, line 65 to

Art Unit: 3691

col.5, line 11; col.6, line 1 to col.9, line 30); wherein the fourth instructions for searching the taxonomy for an alternate category includes instructions for searching one or more of sibling, parent and child categories of the identified category within a predetermined range of the identified category in the taxonomy (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the fourth instructions for searching the taxonomy for an alternate category includes instructions for searching the taxonomy for a category in which the service description meets requirements of a canonical service description associated with the alternate category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); apparatus for registering services in a taxonomy, comprising; means for receiving a registration request, the registration request including a service description and an identification of a category within the taxonomy in which the service is to be registered, means for determining if the service description should be registered in the identified category based on a canonical service description associated with the category, means for registering the service description in the identified category if the determination is that the service description should be registered in the identified category, and means for determining whether a request to add a new category is received if it is determined that the service description should not be registered in the new category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the canonical service description identifies minimum criteria for the category (col.4. line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the means for registering the service description in the category includes means for storing the service description and an associated model description in a storage in association with the category (col.4, Art Unit: 3691

line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the apparatus is part of a service broker within at least one network (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); means for determining whether to add the new category, if a request to add a new category is received, and means for registering the service description in association with the new category, if the new category is added col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the canonical serwce description includes information identifying minimum requirements of the category regarding one or more of security requirements, privacy requirements and communication protocol requirements (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); means for searching the taxonomy for an alternate category in which the service description should be registered if the means for determining indicates that the service description should not be registered in the category; and means for registering the service description in the alternate category if an alternate category is identified by the means for searching (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30); wherein the means for searching the taxonomy for an alternate category includes means for searching one or more of sibling, parent and child categories of the identified category within a predetermined range of the identified category in the taxonomy (col.4. line 65 to col.5. line 11; col.6, line 1 to col.9, line 30); and wherein the means for searching the taxonomy for an alternate category includes means for searching the taxonomy for a category in which the service description meets requirements of a canonical service description associated with the alternate category (col.4, line 65 to col.5, line 11; col.6, line 1 to col.9, line 30).

Art Unit: 3691

(10) Response to Argument

The Examiner reviewed the affidavit submitted on April 4, 2005 and withdrew the rejection. The affidavit pre-dated the Cohn reference, set forth in the previous Office Action. The Examiner incorporated the Yun reference (effective filing date April 7, 1999), which is the same assignee as the original assignee for the Cohn reference (CBS Interactive).

The Appellant argues that Yun does not disclose receiving a registration request with an identified category into which the service is to be registered or determining if the identified category should be used based on a canonical service description associated with the identified category. In response, Yun discloses that the author decides whether a particular type of good or service fits into an existing category or sub-category. If the product fits into an existing category, then it is added, and if not, then a new category is created (co1.6, lines 11-60). Therefore, Yun discloses receiving a registration request with an identified category into which the service is to be registered.

The Appellant argues that Yun does not disclose determining if the identified category should be used based on a canonical service description associated with the identified category. In response, Yun discloses that the process can be used for an existing category or adding a new category (co1.6, lines 11-67). If the category is not suitable, another category may be added. Therefore, Yun discloses determining if the identified category should be used based on a canonical service description associated with the identified category.

Art Unit: 3691

(11) Related Proceeding(s) Appendix

Copies of the court or Board decision(s) identified in the Related Appeals and Interferences section of this examiner's answer are provided herein.

For the above reasons, it is believed that the rejections should be sustained.

Respectfully submitted,

/LALITA M HAMILTON/
